VEI- Awarded IMO Approval Introducing the 7000 Series Monitor

Ft. Lauderdale, U.S.A – VEI, the foremost leader in the design and manufacturing of world class marine navigation systems and monitors, introduces their newest monitor in their lineage of *super sunlight* readable, marinized displays: the 7000 Series Monitor.

The 7000 Series is manufactured in the USA in full compliance with International regulations.

Kelly Hulse, President of VEI, stated, "This latest approval offers a fresh new option for the certified monitor market. Now super yachts and commercial operators have a *choice* with who might provide their bridge solutions."

Michael Bader, Chief Operating Officer of VEI, stated, "This latest approval takes VEI into a new market of ocean going, commercial vessels where IEC approval is necessary. We are very excited and proud and will become a major player in this very limited sector."

The 7000 Series Monitors are hand assembled using the finest quality materials accepted by the International Maritime Organization. With 3 sizes, 18", 20" and 23", this IEC 60945 approval will provide a solution for every large helm station. The 7000 Series comes in a range of brightness levels from 250-1000 nits suitable for interior and exterior use. The 18" monitor is the only sunlight readable IMO approved display in the marketplace today.

ABOUT VEI:

For 20 years VEI's mission has been to provide computers, displays and navigation solutions for the marine industry and its clients. VEI serves their customers with integrity, always anticipating their ever changing needs without ever compromising the quality of their products. With office and manufacturing plant ideally located in Ft. Lauderdale, Florida, VEI remains the leader in marine electronics.

VEI If they haven't invented it yet – they will
